HIGH RENTS .- We have no words of encouragement for persons wishing to rent dwelling or store houses in Knoxville. Our citizens having houses to rent, calculate what their houses cost, and then charge for two years' reat the whole amount. Others aim to recever all they lost by the rebellion by increasing their rents. Others being without the promptings of conscience, take the advantage of men's necessities, and charge all the renter is worth, and even more. The result is, that men of business habits and means are driven out of the place, and compelled to locate elsewhere. Stores are closed, and men are sold out, and the number of business houses is reduced. Let the best business man the country affords buy even a fine stock of goods, and bring them here, and sell at high rates, deduct his rents and taxes, clerk hire and family expenses, and at the end of one year the whole of his capital is consumed. Better by far that he take his money and live on it, as it would stretch out through at lesst two or three years—the rents, clerk hire and taxes supporting his family two years of the time!

THE NEW FEMALE COLLEGE.-Jonesboro' and vicinity have given buildings, grounds and other property, worth ten thousand dollars, to the Holston Annual Conference of the Methodist Episcopal Church, for the establishment of a Female College. A Conference Committee has been appointed to

select a site for a Male College of high order, and expect to open the Preparatory School in September next. Any suggestions from friends of education, as to locality, will be thankfully received. Address the Chairman, Professor P. C. Wilson, Loudon, Tenn.

THE WEATHER.-The weather is very fine and invorable to the growing crops. Rains are frequent, and showers gentle, evidently intended by Providence to serve the best interests of the people. The spring has been a little cold, but the warm, sunny season we are having is working a great improvement in the appearance of the fields and meadows, and gives us ground to hope for glorious crops.

This bill was filed by the heirs of Michael Bowerman enforce the collection of two notes for about \$1,750, which the complainants alleged were given for the purchase money of a tract of land bought by the defendant, Jesse Millikin.

The facts presented by the record are: In 1853 Samuel Bowerman, the son of Michael Bowerman, was arrested torical sketches, popular scientific articles such as for horse stealing in the county of Williamson, and placed in jail by the authorities. Michael Bowerman became bail for his son in the sum of \$1,000 for his appearance to answer the charge. Within a few days after his return to Cannon county, where he resided, he sold the tract of land on which he lived (245 acres) to the defendant, Jesse Milliken, for \$1,750, and gave him a deed for the land in which the receipt of the purchase money is acknow-ledged; the deed was duly registered. After completing his education, he traveled extensively in the East, through Arabia, Persia, and Turkey, those countries where the horse is seen in his highest and key, those countries where the horse is seen in his highest and most perfect condition, for the purpose of making observations with regard to the management and treatment of horses, both in disease and in health, by the inhabitants of the original climates of this noble and useful animal. While in Persia, he was rewarded in his researches by the discovery of the above valuable compound, which he found the Persians administered in almost all cases of disease of their horses, either alone or in conjunction with other remedies. The surprising success that attended its administration led him to investigate the principles upon which its great remedial virtues were founded, and was the means of revolutionizing his whole ideas with regard to the treatment of diseases in horses.
